

DOCUMENTACIÓN TÉCNICA

API y servicios Costa-Go

Documentación oficial del ecosistema web Costa-Go

Versión: 1.0

Actualizado: 21 de agosto de 2026

Fuente: repositorio `main`

1. [Convenciones](#)
2. [Catálogo de endpoints](#)
3. [Realtime](#)
4. [Errores](#)
5. [Integraciones](#)

Este documento describe únicamente funciones verificadas en el código fuente actual. Toda limitación se identifica de forma expresa.

- Base productiva administrada por Render y consumida mediante HTTPS.
- Cuerpos y parámetros se validan con Zod o validación equivalente.
- La sesión/rol no se confía al cliente.
- Los códigos de negocio se traducen a mensajes claros en UI; no se exponen errores SQL.

Catálogo de endpoints

Se detectaron **218** rutas Fastify.

Método	Ruta	Acceso detectado	Fuente

Realtime

El WebSocket se usa para actualizaciones inmediatas de viajes y mensajes. La reconexión debe reconciliar contra la API para evitar depender de un evento perdido o duplicado.

Errores

Clase	Respuesta esperada
Validación	400 con código estable
Sesión	401
Permiso	403 FORBIDDEN
No encontrado	404
Conflicto de negocio	409
Error interno	500 genérico; detalle solo en observabilidad

Integraciones

Costa-Go · API y servicios Costa-Go · Documento controlado v1.0 · Página 0

- Firebase Admin para push.
- Resend para correo transaccional.
- Google Maps/Routes/Places y fallback ORS según configuración.
- Sentry/OpenTelemetry para diagnóstico.
